DETAILED ACTION

Double Patenting

1. Claims 1-9 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 6,300,992.

Although the conflicting claims are not identical, they are not patentably distinct from each other because the only base claim comprises an in-plane switched LCD with substantially homogeneous alignment that is slightly twisted by an angle of 0.5 degrees to 4.0 degrees, and the only claim of U.S. Patent No. 6,300,992 claims an LCD with alignment that is twisted by a predetermined slight angle with embodiments of 2.0 degrees in the specification.

2. Claims 1-9 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-9 of copending Application No. 09/892/568. Although the conflicting claims are not identical, they are not patentably distinct from each other because the only base claim comprises an in-plane switched LCD with substantially homogeneous alignment that is slightly twisted by an angle of 0.5 degrees to 4.0 degrees, and the only base claim of Application No. 09/892/568 claims an LCD with alignment that is twisted by a predetermined slight angle with a dependant claim specifying a range of more than zero and not more than six degrees.

Art Unit: 2871

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
